Projects

- Tradimix-BD** - Its an e-commerce website. In this website, an user can search for any product and get to know about its details. Products are being shown based on categories. Redux-toolkit is used to count products amount, price and all products price calculation. It is fully frontend based and responsive. Used modern SCSS for styling.
Technology used: React, Redux, SCSS, DummyJson, NPM packages and so on.
Live Link: <https://trademix-bd.vercel.app/>
- PropertyHomieRocco** - Its a Real-estate Agent website. In this website, an user can get to know about the real-estate agent and his services. Besides, they can have a look into multiple property listings of him. There is a contact form whereas an user can contact with the agent for any property query.
Technology used: Auth0, Tailwind CSS, HeadlessUI, React, RestAPI, JSON Web Token, Vercel, NodeJs, Express.js, MongoDB and so on.
Live Link: <https://property-homie.vercel.app/>
- Wheelanes** - A car resale platform whereas, buyer, seller and admin - three roles are available for different functionalities in that website. Buyer can see featured cars, different types of cars and can book a car for meeting up with the seller and to have a look of that car for real. The most important part is the seller account which contains adding up new cars and managing them if it is booked or not. A special feature is that a seller can see the active status of his car. Moreover, he can advertise any car with just one click. The admin account handles all sellers and buyers.
Technology used: Firebase, Axios, SwiperJs, React-Query, Tailwind CSS, DaisyUI, NPM packages, NodeJs, MongoDB and so on.
